PTI Job Posting Requisition

Job Title: Microsoft/Senior Microsoft Consultant- Application Developer

Job Description: The successful candidate will have moderate to expert level knowledge in Microsoft .NET application development technologies and should be comfortable working with any part of the software development life cycle. Strong analytical, communication and interpersonal skills are required and the candidate should be comfortable working both individually and in a team environment.

Required Skills: A minimum of five years software development experience in C# or VB.NET, and working with Microsoft SQL Server or Oracle databases is required.

Ancillary Skills: Experience in WPF, WCF, LINQ, Entity Framework, and Team Foundation Server are definitely a plus. Microsoft and other technical certifications are not required but are highly desired.
