PTI Job Posting Requisition

Job Title: SQL Server Database Administrator

Location: Commercial (HQ)

Job Description:

Administer, maintain, develop and implement policies and procedures for ensuring the security and integrity of company and client data systems. Ensure target data systems are adequately backed up and recoverable. Understand service level agreement for each client, and ensure service level agreement terms and conditions are satisfied. Proactively monitor and identify performance issues, and work with client and fellow employees to resolve. Work with client to prioritize database issues, action plans, and projects. Implement data models and database designs, data access and table maintenance codes.

Resolve database performance issues, database capacity issues, replication, and other distributed data issues. Proactively monitor target data systems for availability and common issues using custom scripts and third party products. Work with clients remotely to analyze and solve database issues. Travel to client sites for meetings, system assessments, and projects as scheduled and required. Work closely with fellow employees and client team members to plan, analyze, implement, document, and transfer knowledge for database related issues and solutions. Use professionalism, customer service, technical expertise, and diplomacy to foster long-term client relationships. Provide technical sales support as necessary. Prepare documents and reports for clients and company as required. Take initiative to identify, research, and make recommendations for any issues directly related to the support of applicable data systems. Perform other related duties to successfully support client data systems.

Required Skills:

Qualified candidates will have 5+ years experience functioning as SQL DBA. Experience with SQL Server Reporting Services, Integration Services, or Analysis Services required. Practical familiarity with SQL development, .Net and VB a plus.

Ancillary Skills:

Ability and desire to multi-task. Excellent troubleshooting skills. Excellent written and oral skills. Ability to work independently or on a team. Professional demeanor. Previous consulting experience a plus

Certifications: Certification in SQL, or ability to obtain certification within 6 months.

Notes: Please include any pertinent notes that you deem relevant and applicable.
